SUMMARY

UI/UX Designer, Frontend Developer, and Final-Year in BSIT specializing in Laravel (PHP) frontend development and user interface/user experience design. Experienced in building secure, optimized, and scalable systems, along with visually engaging and responsive website designs. Solid foundation in Figma, PHP, Laravel, Python, Canva, IbisPaint, HTML, CSS (Bootstrap & Tailwind), JavaScript, and cross-platform development. Passionate about cybersecurity, data privacy, and creating intuitive, high-performance user interfaces. Possesses strong knowledge of AI concepts with nearly two years of hands-on experience in prompt engineering, enabling effective integration of AI-driven solutions into design and development workflows.

WORK EXPERIENCE

UI/UX and Frontend Developer AgLend Finance – Australia (Remote Project-based, PH Branch)   2025

- Transformed user experiences by designing intuitive and visually engaging web interfaces, utilizing Figma for sleek wireframing and mockups, and building robust solutions with Laravel and Python.
- Integrated AI-driven features using OpenAI (GPT) to deliver smart, user-centered tools that enhance platform performance and streamline interactions.
- Played a key role in bolstering cybersecurity, actively monitoring systems and implementing essential risk mitigation strategies to safeguard sensitive data.
- Drove innovation through participation in AI-powered internal initiatives, automating workflows and optimizing processes for greater efficiency and cost savings.

EDUCATION

Bachelor of Science in Information Technology – Web Development   **2022–Present (4th Year)**
Brokenshire College, Davao City

Science, Technology, Engineering, and Mathematics (STEM)   **2020- 2022**
A.L. Navarro National High School, Davao City

Electrical Installation & Maintenance (EIM)   **2018–2020**
A.L. Navarro National High School, Davao City

ADDITIONAL INFORMATION

- Technical Skills: Laravel (PHP), Python, JavaScript, MySQL, Figma, OpenAI (GPT), GitHub, Web Designing, Frontend Development (Vue.js, HTML, CSS, Tailwind). Experienced in software and hardware troubleshooting, system installations, and basic network diagnostics. Assists with cybersecurity tasks including risk management, security monitoring, and audit documentations.
- Languages: English, Filipino, Bisaya.
- Certifications: Laravel 101
- Awards/Activities: Techpreneur Award "NETGUARDIAN", Code Wizard Award. Built and presented secure, AI-integrated full-stack systems for university showcases.

ACCOMPLISHMENTS

Software & System Development
- Created a web-based room reservation system for school facilities with database integration and customizable admin permissions.
- Developed a simple book management system with full CRUD functionality.
- Designed and Developed a web based citizen support and complaint management system through vanilla web dev. (Note: Unfinished due to long-term scope.)
- Built and Designed ACADEX, a web-based automated grading system that automates the grades inputted by the professor in brokenshire college. (Note: this system can be enhanced to be capstone project.)

Latest Projects
- Advanced Grading System – Built using Laravel; served as UI/UX Designer and Frontend Developer.
- BC-CampusCompass – A Laravel-based system with secure student/faculty login, clinical tracking, Map Leaflet integration, and system & email notifications.
